tessera

Entity management system

One entity system for every team.

Every entity, owner and deadline in one record.
AI prepares the work.
Your experts approve it.

Who it's for

- Corporate services providers
- Fund administrators
- Company secretarial teams
- Law firms

01 The shift

Not a better EMS. A new foundation for your business.

FROM Software you work around → **Built into your infrastructure**
Designed to run in your cloud or hosted for you, plugged into your systems.

FROM AI pilots on the side → **AI on your terms**
You choose where AI works. Every task still runs without it.

FROM Data you clean up first → **AI-ready data**
Every value traced to its source, every change on the record.

FROM A system per team and region → **One platform, many practices**
Shared core rules, local variations on top.

02 In the app

What Tessera handles in a day

- **Ask, and it's done.** Ask in plain English. Tessera fills the forms and hands you a draft.
- **Every duty worked out.** Deadlines set by rule and checked against the registry.
- **Change at scale.** Up to 2,700 changes in a single approval.
- **Problems found early.** Overdue filings, registry mismatches and missing data, ranked with a fix.
- **Who really owns what.** Ownership traced through every layer to the people at the top.
- **Approved and on the record.** Every change waits as a draft until someone approves it.

03 Platform

One core, extended by modules

- **Modules:** Document management, document generation, obligations engine, legal knowledge bank, agentic workflows
- **Core:** Entity record, drafts and approvals, history and audit, access control, reference data.
- **Graph record store:** entities, people, ownership and obligations as one graph.
- **One API:** behind every screen, used by the assistant and your systems.

04 Connects and runs

Connects to your systems, runs where you need it

- **Integrations:** Company registries, client data systems, data platforms
- **Deployment:** Hosted for you or in your AWS account, on your clients' infrastructure, AI on Amazon Bedrock
